# Image Quality

## 4K

True 4K Ultra High Definition redefines expectations for dashcam video fidelity with 4 times as many pixels compared to Full HD. 4K ensures you have clear footage no matter the situation.

## FHD

1080p Full High Definition is the industry standard for premium dashcams. Suitable for everyday protection and commercial applications with quality and durability as a priority.

## 155°

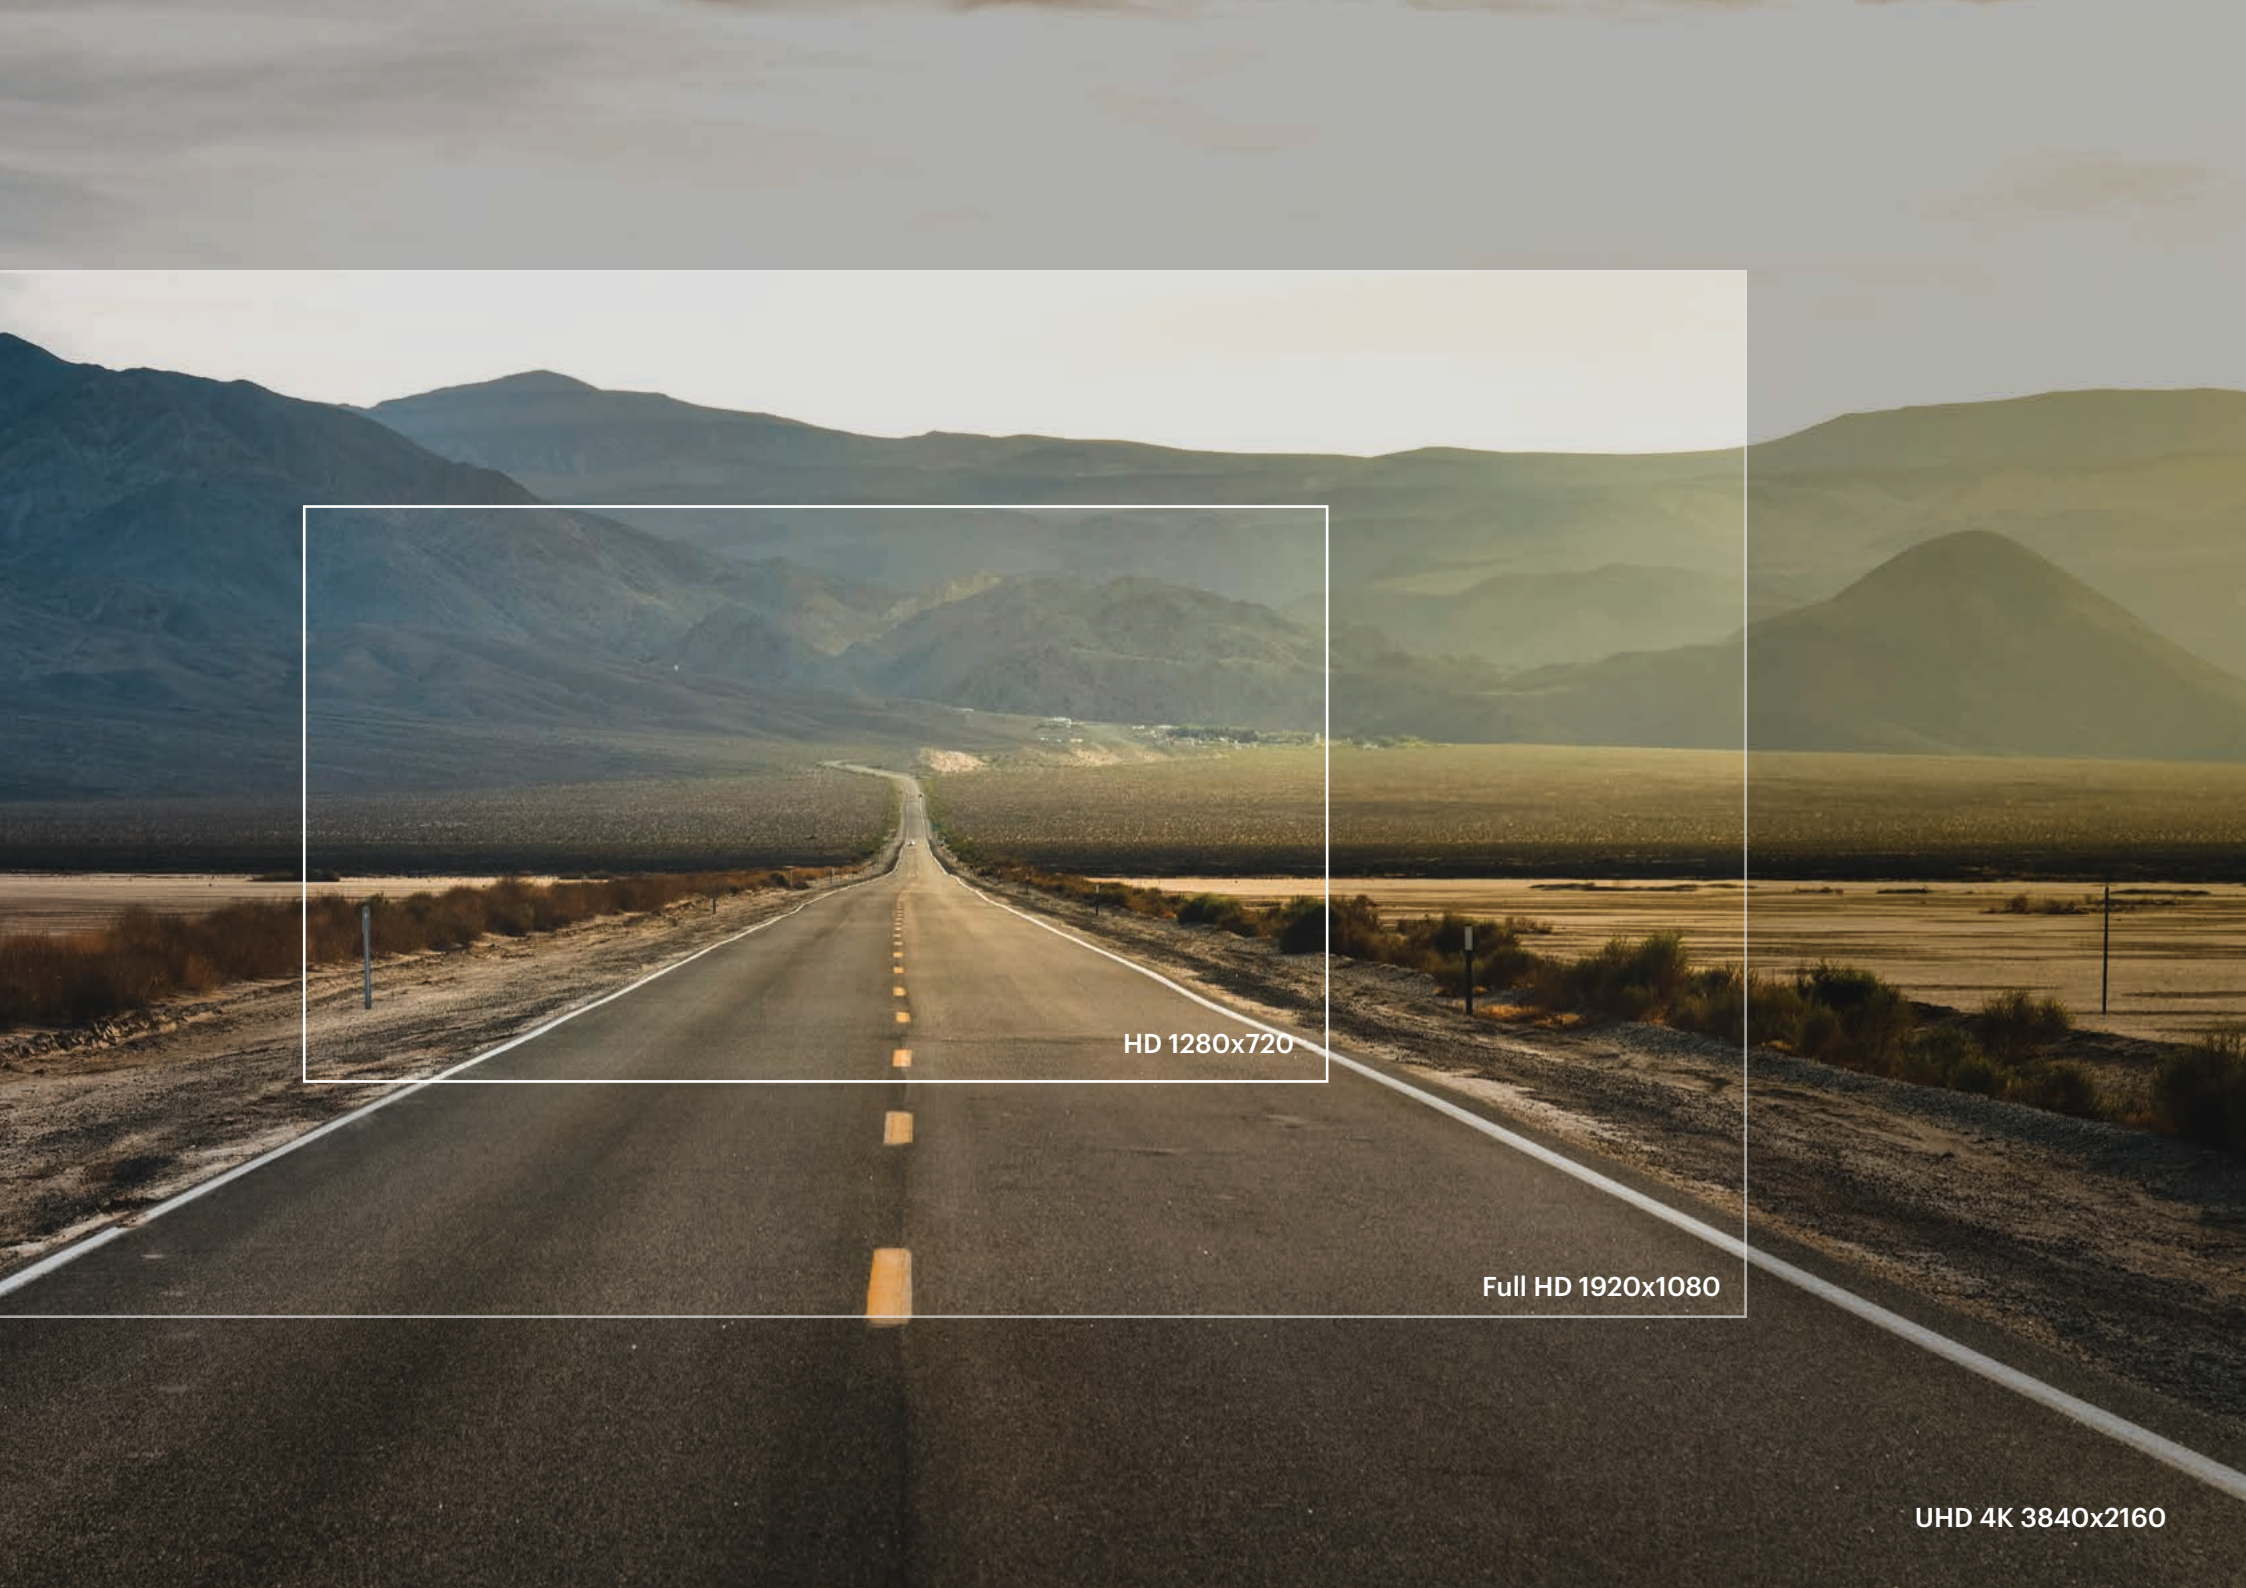

Ultra-wide angle lenses ensure that the dashcam captures more of the road ahead and provides maximum protection around the vehicle.

## WDR

Wide Dynamic Range uses advanced image processing to enhance image quality, ensuring the capture of key details even in low light conditions.

HD 1280x720

Full HD 1920x1080

UHD 4K 3840x2160

BLACKVUE QUALITY

# 3 Year Warranty

Stay covered and register your BlackVue dashcam at [www.blackvue.com.au/warranty-registration/](http://www.blackvue.com.au/warranty-registration/) for industry leading warranty protection and full-time customer support.

REGISTER YOUR BLACKVUE

# 10 Years in Australia

BlackVue has been leading the dashcam industry in Australia since 2013, with first to market technology and features including a mobile WiFi app, Cloud connectivity, 4K Resolution, 3-year warranty and many more. BlackVue continues to pave the way for dashcams in Australia. Join our journey of safety and reliability with BlackVue today.

# WiFi & App

BlackVue's industry leading smart phone app intuitively allows you to view and control your BlackVue devices in the palm of your hand. No more tedious SD card removal.

2.4GHz & 5GHz WiFi options - For fast connection and downloads.

Live View - For perfect setup.

File Playback - Convenient roadside review.

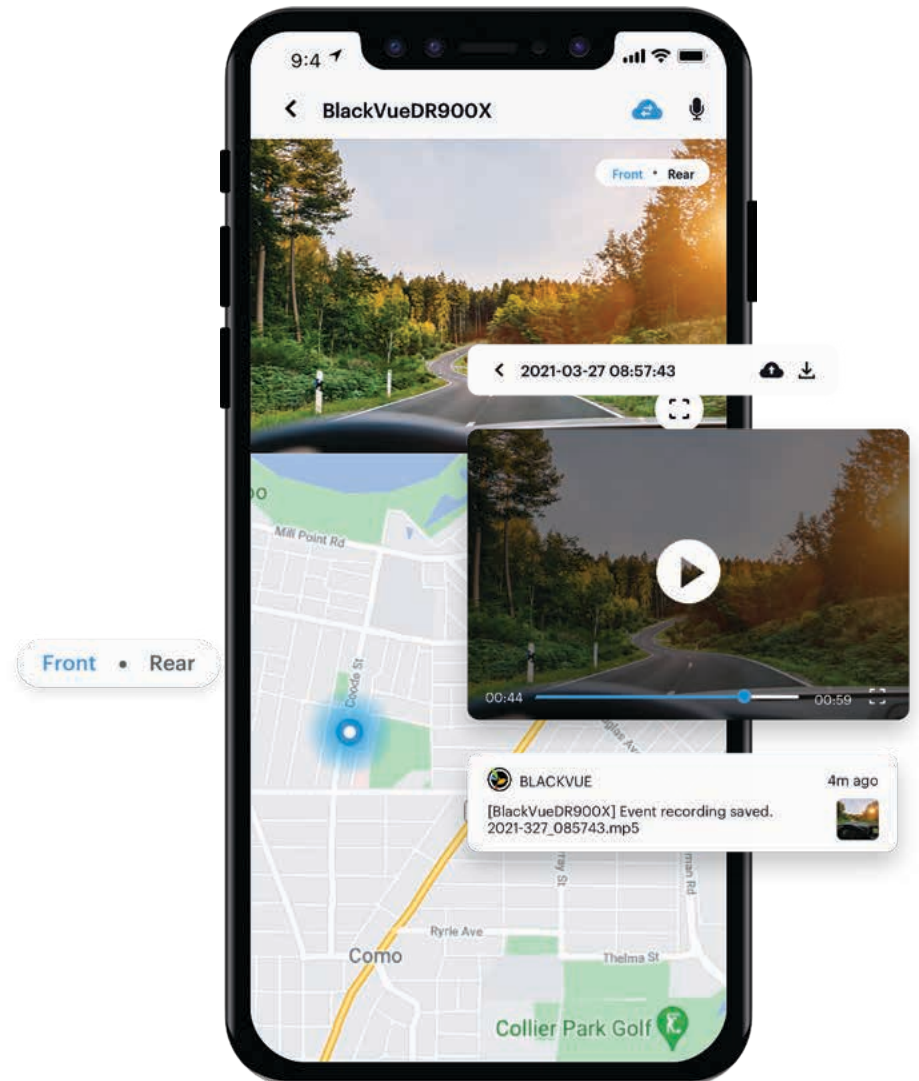

File Download - Keep important files on your phone forever.

File Sharing - Share files with police or insurance.

Control Camera Settings - Configure the dashcam for your requirements.

Seamless Pairing - No passwords or frustrating connection procedures.

Monitor BlackVue External Batteries- Stay on top of any optional external BlackVue battery statistics.

# LTE & BlackVue Cloud

Stay connected to your BlackVue while you're away from your car using LTE mobile data and BlackVue Cloud.

---

Push Notifications – Get updates in real time.

---

Remote Live View – View your dashcam from anywhere.

---

Event Auto Upload – Keep critical files for longer.

---

GPS Tracking – Find your car with the app.

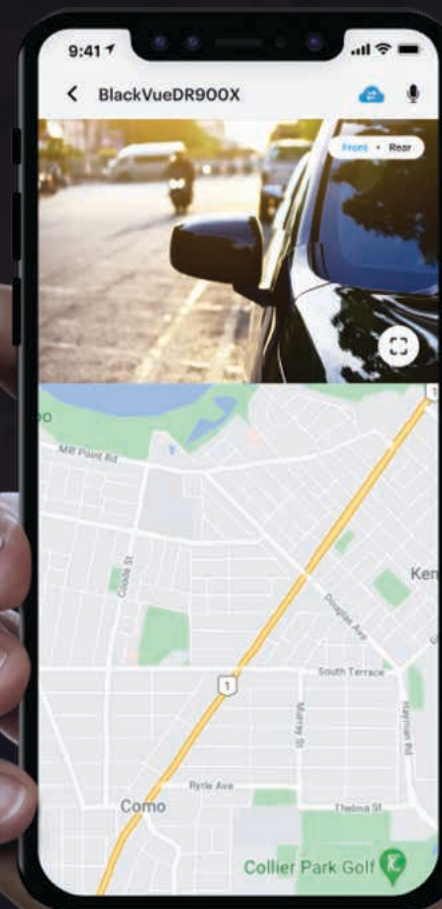

---

Remote Play Back – View files stored on the camera from anywhere.

---

Remote Update – Update your camera remotely.

---

[LEARN MORE](#)

# Parking Mode

BlackVue Parking Mode is a feature that allows BlackVue dashcams to continue recording even when the engine is turned off. It is designed to provide added security and surveillance for your vehicle when you are away, such as when parked in a public space or in your driveway at home.

When enabled, BlackVue Parking Mode uses motion detection and/or impact detection sensors to detect any activity around your vehicle. When triggered, the dashcam automatically starts recording and saves the footage to the memory card. This allows you to review the footage later and identify any potential threats or incidents that may have occurred while you were away.

To use BlackVue Parking Mode, you need a constant power source for your dashcam. This can be achieved through either hardwiring your dashcam to your vehicle's electrical system or by using an external battery pack such as the Power Magic Ultra Battery B-130X.

BlackVue dashcams now come with built-in battery protection (Native Parking Mode) to protect your car battery whilst recording around your car.

## Time Lapse

Time Lapse Parking Mode records in 1 FPS to conserve space on the memory card whilst protecting your car. If the dashcam detects an impact it will revert to regular 30 FPS to capture all the information. Ideal for parking on the street or in high activity environments.

## Motion Detection

Motion Detection in Parking Mode monitors the field of view and only records if motion is detected in front of the lens or an impact is detected around the car. All recording is in 30 FPS which uses more space but offers better clarity. Ideal for private garage parking where less movement occurs.

## Regional Selection

Disable Motion Detection in specific regions in the field of view to minimise recording of unimportant movements.

# Power Magic Ultra B-130X

Introducing the Power Magic Ultra Battery B-130X from BlackVue! This state-of-the-art device is the perfect solution for those looking to extend their dashcam's parking mode recording time.

With the Power Magic Ultra Battery B-130X, you can now enjoy up to 40 hours of continuous recording in parking mode, giving you peace of mind knowing that your vehicle is always protected, even when you're away.

The B-130X's compact design seamlessly integrates into your vehicle's cabin. Its advanced battery management system ensures that the battery stays healthy and is always ready to go when you need it.

The Power Magic Ultra Battery B-130X is compatible with all BlackVue dashcams and is a great solution for those who need that extra protection for cars with sensitive electrical systems.

# Sleek Interface

Factory-like aesthetic.

Award winning design.

Iconic cylindrical profile.

Built-in WiFi.

Built-in parking protection.

BLACKVUE TECHNOLOGY

# Iconic Cylindrical Design

The original cylindrical design offers a sleek, factory-finish that maintains the driver's visibility without drawing attention from the exterior.
